

INSTALLATION

Choose a place for UV lamp (electric adapter must be in dry and safety place). Electrical cord is 4,5m long. Unscrew plastic cover and put UV emitter into a tube cap. Put it into glass bowl and fast screw the plastic cover back. Check rubber o-rings in plastic reductions. Screw these reductions on body of UV lamp and put on pipe from the pump (pipe is not a part of UV lamp). Screw up two plastic holder on selected place and then to these holder put in complete UV lamp (in model UV-5W is holder a part of body UV lamp). At the first switch on the pump and then plug in the electrical cord of UV lamp to electric outlet.

MAINTENANCE

The lamp needs simple service. It is necessary keep track of operation time in hours. The emitter has limitary lifetime (about 8000hours).In change or emitter run on according to installation. Always disconnect the lamp from electrical outlet before handling the lamp!
